**March 2018**  
**UNDERGLAZE TRANSFERS!**

I've been so excited to roll this project out !

This month we will be creating our own (or using pre-made) underglaze transfers!

The design opportunities for this technique are endless and the supplies you will need are simple. Whether you choose hand-drawn designs or complex images using a laser printer, this technique can be used in a variety of applications!

**Project Challenge:**

Create a unique design with underglaze using one of the techniques in the below reference videos. Handbuild or throw a form and apply your transfer. It's that simple!

March

Be Creative!!!

I've included 4 video clips to give directions and inspiration!

LET'S GET CREATING CLAY EXPLORERS!

**Air Dry Clay Users**

Since using underglaze is not possible with air dry clay. Here is an interesting project I think you'll enjoy!  
Create a design and pre-color your clay using one of these techniques.

**Instruction Video Tutorials**

1. Underglaze Transfer using AMACO Velvet Underglaze on greenware AMACO
